

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

GUARDIAN CANADIAN SHORT- TERM INVESTMENT FUND

DECEMBER 31, 2024

This annual management report of fund performance contains financial highlights, but does not contain either the annual financial report or annual financial statements of the investment fund. You can obtain a copy of the annual financial report or annual financial statements at your request, and at no cost, by calling 1-866-383-6546, by writing to us at Guardian Capital LP, Commerce Court West, 199 Bay Street, Suite 2700, P.O. Box 201, Toronto, Ontario, M5L 1E8, or by visiting our website at www.guardiancapital.com/investmentsolutions or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The primary objective of the Guardian Canadian Short-Term Investment Fund (the "Fund") is the preservation of capital together with earning income through investment in high quality, short-term fixed-income securities.

The Manager uses fundamental analysis and other rational measures of value to identify and actively manage high quality, short-term (less than one year) fixed income securities issued or guaranteed primarily by governments, Canadian corporations and Canadian chartered banks. The Fund will invest primarily in high credit quality issues that have been scrutinized for credit quality through an ongoing internal assessment across qualitative and quantitative factors. Spread analysis and duration-neutral strategies, such as barbell and bullet structures, are used for adding value through sector allocation and security selection.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors with a low tolerance for risk, particularly those who seek capital preservation and secure income.

Results of Operations

This commentary is based on the performance of Series W units of the Fund. Returns for other Series of units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details.

The Fund's net asset value decreased by 38% to \$120.5 million at December 31, 2024 from \$194.4 million at December 31, 2023. Of this change, an increase of \$7.5 million was provided by investment performance, net of fees and expenses, and a decrease of \$81.4 million was attributable to net redemptions.

Series W units of the Fund posted a return of 4.2% for the year. The Fund's blended benchmark, 50% FTSE Canada 60 Day T-Bill Index and 50% FTSE Canada 30 Day T-Bill Index, returned 4.8% for the same period. The Series W return is after the deduction of fees and expenses, unlike the benchmark's return.

Bond markets delivered positive total returns in 2024, driven by lower inflation, signs of moderating economic growth and easing monetary policy, resulting in a steepening of the yield curve fueled by short-term rates as the Bank of Canada (BoC) reduced its policy rate by 175 basis points from 5.00% to 3.25%, while the Federal Reserve (Fed) lowered the fed funds target rate by 100 basis points from 5.50% to 4.50%. Globally, other central banks took similar measures as the European Central Bank (ECB) lowered its policy rate by 100 basis points while the Bank of England (BoE) lowered rates by 50 basis points.

Domestically, the net result was positive performance across fixed income markets (FTSE Canada Bond Universe Index +4.23%), with short-term bonds (FTSE Canada Short-Term Overall Bond Index +5.70%) outperforming both mid-term (FTSE Canada Mid-Term Overall Bond Index +4.65%) and long-term (FTSE Canada Long-Term Overall Bond Index +1.35%) bonds. Corporate bonds (FTSE Canada All Corporate Bond Index +6.97%) outperformed government bonds (FTSE Canada Government Bond Index +3.31%) as credit spreads on investment grade bonds narrowed (FTSE Canada All Corporate Bond Index – Option-Adjusted Spread (OAS)* change was -35 basis points) driven by positive credit rating migration, lower refinancing premiums, and well-absorbed supply on new issues. *OAS is a financial metric used to assess the additional yield investors demand for taking on the risk associated with an option-embedded security.

The Manager expects monetary policy should be supportive of returns for fixed income assets in the near term. However, positive economic surprises may result in a recalibration of the yield curve, particularly in the mid-and long-term segments. Rate volatility is likely to remain top of mind for investors as markets reassess the path for policy rates against ongoing concerns over the economic outlook, escalating

geopolitical tensions in the Middle East and uncertainties around U.S. economic policy.

The Fund's overweight exposure in Provincial T-Bills contributed positively to relative performance as Provincial T-Bills provided a slight yield pick-up relative to Federal T-Bills.

The Fund continues to maintain its overweight exposure in Provincial bonds, concentrating within the one to three-month Treasury Bill curve. The Manager continues to actively seek attractive opportunities to enhance portfolio structure and relative total returns.

The Manager integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. ESG considerations are evaluated for material financial impact on a company's sustainability and business operations, but which may have a limited role in investment decisions for the Fund. The consideration of ESG issues is only one of a number of elements in the portfolio construction process and may or may not have a material influence on portfolio composition at any given time. Active engagement and proxy voting are a core part of the Manager's stewardship approach, and the Manager participates in these activities in a manner suitable to the asset class and Fund. Certain securities, such as derivatives, cash, money market instruments, bonds, asset-backed securities, commercial paper or other similar instruments, may not be subject to ESG considerations due to the nature of such instruments.

The Fund's ESG characteristics and performance may change from time to time. Please review the Fund's prospectus for more details on how the Fund's investment strategy incorporates responsible investing considerations and the associated risks. For more information, the Manager posts its annual proxy voting reports, along with an annual Responsible Investing Report and its Responsible Investing Policies on its website:

Recent Developments

Notwithstanding the likelihood that heightened near-term headline risk associated with politics, along with the still high degree of uncertainty around the near-term path for monetary policy, keeps rate volatility somewhat elevated in the coming months; thus, the ultimate path of least resistance for domestic market yields is likely to be lower as the central bank easing cycle exerts downward pressure on rates.

The impact, however, is likely to be felt more at the front-end of the yield curve where rates are far more sensitive to monetary policy. The result is an expected further steepening of the curve into more "normal" territory, if the spread between 10-year and 2-year government bond yields finally dis-inverts, or turns positive, which would be the first time since the Fall of 2022.

The looming election in Canada suggests a willingness to rein in fiscal spending, while the prospect of the adoption of an expansionary fiscal policy in the US could add upside risk to longer-term rates.

The regime change in the US and the accompanying uncertainty about the returning Administration's approach to economic policy, especially with respect to international relations and trade, has clouded the outlook for not just the US but the entire world. The potential introduction of new tariffs and the prospect of retaliation would have a significant impact on global growth, given that the export of goods and services across borders accounts for roughly one-third of global output. As well, the cost increases associated with tariffs and the potential implications for global interest rates add to the uncertainty, which has the impact of restraining investment and spending decisions, and the potential for repercussions that would be felt throughout the global economy and financial markets.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a "related party" of the Fund. The Manager is responsible for the day-to-day operations

of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, based on the average Net Asset Value of the Fund, as detailed in the Management Fees section below. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Manager also receives an Administration Fee from the Fund, amounting to 0.02% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of the Fund. The Independent Review Committee (“IRC”) has approved the Manager’s Policy for this item and the Manager relies on this approval as a standing instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series W units are subject to a management fee which is based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series W management fee is 0.50% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the period.

	Series I	Series W
Investment management and other general administration	n/a	70.0%
Trailer Commission	n/a	30.0%

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for the annual period from January 1 to December 31 for each calendar year shown, and illustrates how the Fund's performance has changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of that financial year.

[1] This information is provided as at the end of each year indicated.

[2] The management expense ratio is based on total expenses (excluding commissions, other portfolio transaction costs and withholding taxes) of the Fund and its proportionate share of the total expenses of the Underlying Funds, where applicable, for the stated year and is expressed as an annualized percentage of daily average net asset value during the year.

[3] The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and its proportionate share of the Underlying Funds' portfolio transaction costs, where applicable, expressed as an annualized percentage of daily average net asset value for the year.

[4] The Fund's portfolio turnover rate indicates how actively its portfolio advisor trades portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in the portfolio once in the course of a year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
