MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The principal objective of the Guardian Short Duration Bond Fund (the “Fund”) is the provision of current interest income while at the same time preserving capital and seeking opportunities for capital appreciation, while maintaining relatively short portfolio duration, through investment in bonds, debentures, notes or other evidence of indebtedness.

The Manager uses a proactive, disciplined management approach while employing various analytical tools to identify investments that offer value on a relative basis with a view to providing current income while maintaining relatively short portfolio duration and preserving the prospect for some potential capital growth. We adhere to a risk management process that is designed to limit total exposure to individual issuers, diversify exposure to various credit risks, and maintain portfolio liquidity. The Fund may be invested in foreign pay Canadian issues and securities of foreign issuers. A maximum of 30% of the Fund may be held in foreign currency denominated securities. The Fund does not invest in securities issued by a corporation in respect of which the majority of revenue is derived from the manufacture or distribution of tobacco related products.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors with a low tolerance for risk, particularly those who are looking for a core Canadian fixed-income fund, but who are concerned about the risk of rising interest rates and will accept lower interest income in exchange for the lower volatility of shorter-term bonds and who have a short term investment horizon.

Results of Operations

This commentary is based on the performance of Series A units of the Fund. Returns for other Series of

units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details.

The Fund’s net asset value increased by 12% to \$40.7 million at June 30, 2025 from \$36.5 million at December 31, 2024. Of this change, an increase of \$0.9 million was provided by investment performance, net of fees and expenses, and an increase of \$3.4 million was attributable to net subscriptions.

Series A units of the Fund posted a return of 1.9% for the period. The Fund’s benchmark, the FTSE Canada Short Term Overall Bond Index, returned 2.2% for the same period. The Series A return is after the deduction of fees and expenses, unlike the benchmark’s return.

Bond markets delivered positive total returns during the first half of 2025, driven by moderating inflation, signs of slowing economic growth and easing monetary policy. This resulted in a steepening of the yield curve, led by lower short and mid-term rates, as the Bank of Canada (BoC) reduced its policy rate by 50 basis points from 3.25% to 2.75%. The Federal Reserve (Fed) kept the fed funds target rate unchanged at 4.50%. Globally, other central banks took similar easing measures, as the European Central Bank (ECB) lowered its policy rate by 100 basis points, while the Bank of England (BoE) lowered rates by 25 basis points, and the Swiss National Bank (SNB) lowered rates by 50 bps to 0%.

Domestically, the net result was positive performance for the broader fixed income universe (FTSE Canada Bond Universe Index; +1.44%), with mid-term bonds (FTSE Canada Mid-Term Overall Bond Index; +2.30%) outperforming both the short-end (FTSE Canada Short-Term Overall Bond Index; +2.19%) and the long-end (FTSE Canada Long-Term Overall Bond Index; -0.57%) bonds. Corporate bonds (FTSE Canada All Corporate Bond Index; +2.28%) outperformed government bonds (FTSE Canada All Government Bond Index; +1.17%).

The Fund outperformed its benchmark over the six-month period, driven by credit selection and sector allocation. The Fund’s underweight exposure to

corporate bonds within the Financial sector and credit selection of corporate bonds within the Real Estate sector contributed positively to relative performance. The Fund's overweight exposure to corporate bonds within the Real Estate sector also contributed positively to relative performance. The Fund's underweight exposure to Provincial government bonds detracted from relative performance.

The Manager integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. ESG considerations are evaluated for material financial impact on a company's sustainability and business operations, but which may have a limited role in investment decisions for the Fund. The consideration of ESG issues is only one of a number of elements in the portfolio construction process and may or may not have a material influence on portfolio composition at any given time. Active engagement and proxy voting are a core part of the Manager's stewardship approach, and the Manager participates in these activities in a manner suitable to the asset class and Fund. Certain securities, such as derivatives, cash, money market instruments, bonds, asset-backed securities, commercial paper or other similar instruments, may not be subject to ESG considerations due to the nature of such instruments.

The Fund's ESG characteristics and performance may change from time to time. Please review the Fund's prospectus for more details on how the Fund's investment strategy incorporates responsible investing considerations and the associated risks. For more information, the Manager posts its annual proxy voting reports, along with an annual Responsible Investing Report and its Responsible Investing Policies on its website:

Recent Developments

The Fund continues to maintain an overweight exposure to corporate bonds within the Energy and Real Estate sectors. The Manager continues to actively seek attractive opportunities to enhance portfolio structure and relative total returns.

The outlook for the Canadian economy remains uncertain, as the downside risks to growth are starting to manifest, particularly in tariff-sensitive sectors. Monetary policy is expected to be supportive of fixed income returns, as the BoC continues on its path of easing/expansionary policy of lower rates.

The regime change in the US and the accompanying uncertainty about the Administration's approach to economic policy, especially with respect to international relations and trade, has clouded the outlook for not just the US but the entire world and resulted in significant financial market volatility. The introduction of sweeping new tariffs stands to have a significant negative impact on the trajectory of global growth, given that the export of goods and services across borders accounts for roughly one-third of global output. As well, the cost increases associated with tariffs carry material implications for global central bank policy and interest rates, adding to the uncertainty and greatly impacting investment and spending decisions, which in turn has had significant impacts on the outlook for the global economy and financial markets.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a "related party" of the Fund. The Manager is responsible for the day-to-day operations of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, based on the average Net Asset Value of the Fund, as detailed in the Management Fees section below. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Manager also receives an Administration Fee from the Fund, amounting to 0.04% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of the Fund. The Independent Review Committee ("IRC") has approved the Manager's Policy for this item and the Manager relies on this approval as a standing

instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series A and Series F units are subject to a management fee which is based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series A management fee is 0.80% per annum. The Series F management fee is 0.30% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the period.

	Series A	Series F	Series I
Investment management and other general administration	37.5%	100.0%	n/a
Trailer Commission	62.5%	n/a	n/a

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for the annual period from January 1 to December 31 for each calendar year shown, and illustrates how the Fund's performance has changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of that financial year.

[1] This information is provided as at the end of each period indicated.

[2] The management expense ratio is based on total expenses (excluding commissions, other portfolio transaction costs and withholding taxes) of the Fund and its proportionate share of the total expenses of the Underlying Funds, where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

[3] The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and its proportionate share of the Underlying Funds' portfolio transaction costs, where applicable, expressed as an annualized percentage of daily average net asset value for the period.

[4] The Fund's portfolio turnover rate indicates how actively its portfolio advisor trades portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in the portfolio once in the course of a year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
