

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

GUARDIAN MANAGED BALANCED PORTFOLIO

JUNE 30, 2023

This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or interim financial statements of the investment fund. You can obtain a copy of the interim financial report or interim financial statements at your request, and at no cost, by calling 1-866-383-6546, by writing to us at Guardian Capital LP, Commerce Court West, 199 Bay Street, Suite 2700, P.O. Box 201, Toronto, Ontario, M5L 1E8, or by visiting our website at www.guardiancapital.com/investmentsolutions or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The primary objective of the Guardian Managed Balanced Portfolio (the "Fund") is the achievement of a balance between long-term growth of capital and reasonable income through diversified investments in equity or equity-related securities and in fixed-income securities, either long-term or short-term. The Fund invests in securities of other investment funds managed by Guardian Capital LP, and may also invest in other securities, including exchange traded funds, to achieve its objectives.

The Manager uses strategic and tactical asset allocation to create a portfolio diversified by investment style, asset class and geographic region, with an emphasis on growth of capital. The portfolio generally includes exposure to Canadian equities, developed market global equities and investment grade fixed-income securities. Currently, the Fund's long-term asset mix policy is 60% stocks and 40% bonds, with cash reserves incorporated in these two asset classes. If the asset mix between equities and bonds varies by more than 15% from the long-term mix, the Fund is normally rebalanced. The Fund may be exposed to derivatives, used for hedging or non-hedging purposes, through its investments in underlying funds.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors with a low to medium tolerance for risk, particularly those who seek diversified exposure to equity and fixed income securities and plan to hold their investment for the medium to long term.

Results of Operations

This commentary is based on the performance of Series I units of the Fund. Returns for other Series of units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details. Please

note that this Fund invests all, or substantially all, of its assets in other investment funds [the "Underlying Funds"]. Individual securities referenced in this commentary may refer to the securities held in one of the Underlying Funds, and not necessarily as a direct holding of this Fund.

The Fund's net asset value increased by 3% to \$70.5 million at June 30, 2023 from \$68.2 at December 31, 2022. Of this change, an increase of \$4.5 million was provided by investment performance and a decrease of \$2.2 million was attributable to net redemptions.

Series I units of the Fund posted a return of 6.7% for the period. The Fund's blended benchmark, 40% FTSE Canada Universe Bond Index, 30% S&P/TSX Capped Composite Index and 30% MSCI World Index (Net C\$), returned 6.4% for the same period. The Fund's return is after the deduction of fees and expenses, unlike the benchmark's return.

Financial markets have proven to be much kinder to balanced portfolio investors than last year, so far through 2023. Both stocks and bonds have been able to turn in positive performance year-to-date despite the persistent challenges (including ongoing geopolitical risks, domestic political uncertainties, elevated interest rates and volatility, banking stresses) as investors have turned less pessimistic on the outlook against indications of continued economic resilience and positive developments with respect to inflationary pressures kept interest rates largely rangebound.

The Fund's tactical overweight toward Equity, and especially Global Equity which has been the top performing asset class this year, and underweight to Fixed Income (the laggard) resulted in positive contributions to performance from asset allocation.

The negative impact of security selection within Equity allocations, however, detracted and partially offset the outperformance versus its blended benchmark. In particular, the Fund's large weights in the underperforming Guardian i³ Global Dividend Growth Fund, Guardian Fundamental Global Equity Fund and Guardian Canadian Growth Equity Fund made

negative contributions to relative performance, as did the allocation to Cash.

In January, the Fund cut its position in the mid-term Guardian Investment Grade Corporate Bond Fund against the view that central bank tightening cycles were nearing their end point resulting in market interest rates being at, or very near, their peaks. The balance of risks suggested that rates were, therefore, more likely to move lower than higher going forward, which supported increasing the duration in the Fund's Fixed Income allocation by redeploying the funds to the core Guardian Canadian Bond Fund — this allocation was increased further throughout Q1, and again in June.

A position was initiated in the Guardian i³ International Quality Growth Fund in February against the view that there are good opportunities in Developed Markets (DM) outside of the US (namely, Europe, Australasia and the Far East or "EAFE") given the better relative valuations and growth outlooks.

Also, the decision was made to further tilt Equity exposures toward US quality-growth strategies later in Q1 on the grounds that these mandates typically perform better in lower growth, higher volatility environments. This was done by reducing exposure to the Guardian i³ Global Quality Growth Fund and reallocating to the Guardian U.S. Equity All Cap Growth Fund — similar shifts were made through Q2 as well.

Overall, the Fund's portfolio asset mix remains overweight Equity with a bias toward Global Equity (and a continued tilt toward EAFE) and a focus on quality-growth strategies that stand to benefit from a market environment in which general growth moderates to lower rates and profitability faces greater constraints. In Fixed Income, there remains a skew in favour of high-quality corporate credit, for which carry and spreads are attractive, and duration remains below that of the broad bond market index (though the gap has been narrowed through the first half of the year).

As this Fund is a fund-of-funds, it does not directly engage in proxy voting or active engagement, this is

conducted by the Manager of the Underlying Funds. As the Underlying Funds are related issuers, this is conducted by the Manager of the Underlying Funds, who integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. Active engagement and proxy voting are a core part of the Underlying Fund Manager's stewardship approach, and the Underlying Fund's investment team participates in these activities in a manner suitable to the asset class and Underlying Fund. The investment teams of the Manager of the Underlying Funds focus on ESG and other factors which they believe could be financially material and/or impact the long-term sustainability of the company. The consideration of ESG issues is one of a number of elements in the portfolio construction process and, may or may not have a material influence on portfolio composition at any given time. For more information, the Underlying Funds' Manager posts its annual proxy voting reports, along with an annual Responsible Investing Report and its Responsible Investing Policies on its website: <https://www.guardiancapital.com/investmentsolutions/>

Recent Developments

While the outlook for the global economy has cleared relative to the start of the year and the backdrop appears somewhat constructive for the near-term, many uncertainties and challenges remain, which are likely to weigh on markets and lead to bouts of volatility.

Evidence of continued resiliency in economic resiliency underpinned by consumers, even if it is likely to be at a more moderate pace, is likely to keep central banks from moving away from their now restrictive policy stances in a material fashion any time soon. Sustained indications of inflationary pressures coming off the boil as supply chains normalize and tighter credit conditions temper demand, however, suggest that further hikes may be limited.

This environment would appear to be positive for a continued improvement in earnings momentum, which would generate a fundamental support for equity markets. As well, that this comes against the fact

that the bulk of gains year-to-date have been concentrated among a very narrow subset of stocks indicates that market valuations are not particularly stretched.

As such, the outlook still appears to favour exposure to equities — particularly for those strategies that take a more active approach to stock selection given that “headline” increases may well be somewhat muted by internal churn within indexes as this year’s laggards close the gap with the leaders.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a “related party” of the Fund. The Manager is responsible for the day-to-day operations of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, based on the average Net Asset Value of the Fund, as detailed in the Management Fees section below. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Manager also receives an Administration Fee from the Fund, amounting to 0.04% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of the Fund. The Independent Review Committee (“IRC”) has approved the Manager’s Policy for this item and the Manager relies on this approval as a standing instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period.

The Fund invests in assets in other Guardian Capital Funds (the “Underlying Funds”), which are related issuers. The Fund may also invest in other third-party funds which are not related. With respect to investments in related issuers, the Manager has relied on the approval that it has received from the Independent Review Committee (“IRC”). The approval requires the Manager to comply with its current policy and procedures regarding investments in related

issuers and to report periodically to the IRC. The Manager will not duplicate management fees paid to an Underlying Fund that is a related issuer and will not pay any performance fee in respect of any investment in the Guardian Strategic Income Fund.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series W units are subject to a management fee which is based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series W management fee is 1.50% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the period.

	Series I	Series W
Investment management and other general administration	n/a	33.3%
Trailer Commission	n/a	66.7%

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for the period from January 1, 2023 to June 30, 2023, and illustrates how the Fund's performance has changed from year to year. The chart shows in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of that financial year.

The performance shown for Series I below includes results prior to March 30, 2011 when the Fund was not a reporting issuer. Had the Fund been subject to the additional regulatory requirements applicable to a reporting issuer during such period, the expenses of the Series I units of the Fund would likely have been higher. The financial statements for the period when the Fund was not a reporting issuer, are available on the Manager's website at www.guardiancapital.com or upon request.
