

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

GUARDIAN CANADIAN BOND FUND

JUNE 30, 2023

This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or interim financial statements of the investment fund. You can obtain a copy of the interim financial report or interim financial statements at your request, and at no cost, by calling 1-866-383-6546, by writing to us at Guardian Capital LP, Commerce Court West, 199 Bay Street, Suite 2700, P.O. Box 201, Toronto, Ontario, M5L 1E8, or by visiting our website at www.guardiancapital.com/investmentsolutions or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The primary objective of the Guardian Canadian Bond Fund (the “Fund”) is the provision of a high level of current interest income while at the same time preserving capital and seeking opportunities for capital appreciation primarily through investment in Canadian bonds, debentures, notes or other evidence of indebtedness.

The Manager uses a proactive, disciplined management approach while employing various analytical tools to identify investments that offer value on a relative basis, with a view to maximizing current income while preserving the prospect for some capital growth. The Manager adheres to a risk management process that is designed to limit total exposure to individual issuers, diversify exposure to various term maturities and credit risks, and maintain portfolio liquidity. The Fund may be invested in foreign pay Canadian issues and securities of foreign issuers. A maximum of 30% of the Fund may be held in foreign-denominated securities. The Fund does not invest in securities issued by a corporation in respect of which the majority of revenue is derived from the manufacture or distribution of tobacco-related products.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors with a low tolerance for risk, particularly those who are looking for a core Canadian fixed-income fund for their portfolio.

Results of Operations

This commentary is based on the performance of Series I units of the Fund. Returns for other Series of units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details.

The Fund’s net asset value increased by 47% to \$207.1 million at June 30, 2023 from \$140.8 at December 31,

2022. Of this change, an increase of \$3.0 million was provided by investment performance and an increase of \$63.3 million was attributable to net subscriptions.

Series I units of the Fund posted a return of 2.4% for the period. The Fund’s benchmark, FTSE Canada Universe Bond Index, returned 2.5% for the same period. The Fund’s return is after the deduction of fees and expenses, unlike the benchmark’s return.

Canadian bonds bounced back, rising 2.51%, after two consecutive calendar years of negative returns. The FTSE Canada Short-, Mid- and Long-Term Indices returned 1.00%, 1.85%, and 5.39%, respectively. Provincial bonds (overall) returned 3.32% while corporate bonds (overall) returned 2.97%.

The Bank of Canada (BoC) implemented another rate increase at its January meeting, but announced it would pause to assess the effects of a cumulative 425bps of rate hikes since early 2022. Silicon Valley Bank’s failure in late March was assumed to be the proverbial thing that broke to signal the end of the hiking cycle but turned out to be another false positive. Following decisive actions by the US Federal Reserve and the US banking regulators to stem systemic risks from developing, yields experienced large upward moves after stronger-than-expected employment data, inflation, and GDP reports in April and May. This economic resilience persisted in Q2 and caused the BoC to surprise markets with a 25 basis point hike at its June meeting and suggested that more adjustments may be needed to better rebalance labour markets as well as wage and price pressures. Similarly in the US, the Federal Reserve also announced a 25 basis point hike at its May meeting, to an upper bound of 5.25%. While inflation remains above target in both Canada and the US, both countries now have the two lowest inflation figures amongst the G7 countries.

The unexpected increase by the BoC caused a repricing of the Canadian yield curve, with the front end flattening and approaching levels last seen in the first quarter before Silicon Valley Bank’s failure. The curve’s inversion deepened as a result, and the Bank’s message of needing to have a restrictive policy stance for an extended period of time aligns with our view that rates

will remain higher for longer. Long-term bonds outperformed short- and mid-term bonds, with mid-term federals falling the most.

While credit spreads drifted wider in April and May, a strong risk-on rally in equity markets saw credit spreads finish the period narrower than they began, reflecting a general consensus that central banks are likely to manage to rebalance demand without engineering a significant economic slowdown. As a result, corporate bonds outperformed government bonds during the period.

The Fund maintains a moderately short duration position relative to its benchmark. The Fund's portfolio remains overweight Financials and provincial bonds at the expense of federal bonds, both in terms of absolute weight and on a duration-adjusted basis. The Fund is overweight the middle of the yield curve, particularly the 5, 7, and 10 year nodes. The overweight of the 10 year node was increased during the period, in anticipation of the yield curve steepening and the middle of yield curve outperforming. During the period, the Manager increased duration by selling shorter-date bonds and buying mid-term bonds in the Financials sector and in federal bonds. A new position was initiated in Ontario 2032 provincial bonds as well.

The Manager integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. Active engagement and proxy voting are a core part of the Manager's stewardship approach, and the Fund's investment team participates in these activities in a manner suitable to the asset class and Fund. Our investment teams focus on ESG and other factors which they believe could be financially material and/or impact the long-term sustainability of the company. The consideration of ESG issues is one of a number of elements in the portfolio construction process and, may or may not have a material influence on portfolio composition at any given time. For more information, the Manager posts its annual proxy voting reports, along with an annual Responsible Investing Report and its Responsible Investing Policies

on its website:

<https://www.guardiancapital.com/investmentsolutions/>

Recent Developments

Aggressive interest rate hiking cycles, on both sides of the border, to tame inflation is now bearing fruit, although we have yet to feel the full effects of the initial increases (rate hikes typically take about 18 months to fully filter through the economy) and inflation still remains above long-term targets. Looking ahead, both the BoC and the US Federal Open Market Committee (FOMC) have suggested that they are closer to a prolonged pause at these elevated rates and future adjustments, if needed, are likely to be modest. The Canadian yield curve is more deeply inverted now than it was at the beginning of the year, with yields at the short end of the curve rising and the long end remaining relatively unchanged. The Fund remains modestly short duration and has overweighted its key rate exposures, relative to the benchmark, in the belly of the yield curve. While this position has not born fruit as expected, the Manager anticipates that the lagged effects of the significant rate increases to date are yet to be reflected fully and also anticipates that the current economic resilience will give way to much slower growth into the latter half of this year. If so, the yield curve will begin to re-steepen and the belly of the curve is expected to outperform.

Credit spreads, on the other hand, remain wider than the multi-year lows seen post-pandemic, as financial conditions have tightened. The Manager believes credit offers the best risk-adjusted return potential at this point in the cycle, given the spread "cushion", and that higher quality credit, in particular, is more attractive, as the effect of higher interest rates begins to show in corporate profitability. The Fund remains overweight corporate bonds at the expense of federal and provincial bonds, with a concentration in the Financials sector. The Manager expects spreads to remain volatile in the near term, but believes it will be compensated with spread carry. Additional spread widening is likely to present an opportunity to selectively add to the Fund's corporate bond positioning.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a “related party” of the Fund. The Manager is responsible for the day-to-day operations of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, based on the average Net Asset Value of the Fund, as detailed in the Management Fees section below. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Manager also receives an Administration Fee from the Fund, amounting to 0.04% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of the Fund. The Independent Review Committee (“IRC”) has approved the Manager’s Policy for this item and the Manager relies on this approval as a standing instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period.

The Fund may invest some of its available short term cash in units of Guardian Canadian Short-Term Investment Fund, another investment fund managed by Guardian Capital LP and a related issuer, which invests its assets in high-quality short-term fixed-income securities. With respect to investments in related issuers, the Manager has relied on the approval that it has received from the IRC. The approval requires the Manager to comply with its current policy and procedures regarding investments in related issuers and to report periodically to the IRC. The Manager will not duplicate management fees paid to an underlying fund that is a related issuer.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series A and Series F units are subject to management fees which are based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series A management fee is 0.80% per annum. The Series F management fee is 0.30% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the period.

| | Series A | Series F | Series I |
|--|----------|----------|----------|
| Investment management and other general administration | 37.5% | 100.0% | n/a |
| Trailer Commission | 62.5% | n/a | n/a |

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for the period from January 1, 2023 to June 30, 2023, and illustrates how the Fund's performance has changed from year to year. The chart shows in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of that financial year.

The performance shown for Series I below includes results prior to March 30, 2011 when the Fund was not a reporting issuer. Had the Fund been subject to the additional regulatory requirements applicable to a reporting issuer during such period, the expenses of the Series I units of the Fund would likely have been higher. The financial statements for the period when the Fund was not a reporting issuer, are available on the Manager's website at www.guardiancapital.com or upon request.

Annual Compound Returns

The tables below shows the historical compound returns of the Fund's Units for the periods indicated, as at June 30, 2023. The returns of a broad based market index are also shown.

| | 1 Yr | 3 Yrs | 5 Yrs | 10 Yrs |
|-------------------------------------|------|-------|-------|--------|
| Series A (%) | 2.43 | -4.62 | 0.16 | n/a |

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts, but rather represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements, as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments and the effects of competition in the geographic and business areas in which the Fund may invest. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, Guardian Capital LP does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
