MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The primary objective of the Fund is to provide income over a pre-determined time horizon by investing in a portfolio consisting primarily of Canadian-dollar denominated investment grade bonds with an effective maturity in 2027. The Fund's termination date is anticipated to be on or about November 30, 2027.

At the time of investment, select a portfolio consisting primarily of Canadian-dollar denominated investment grade bonds with an effective maturity in the calendar year outlined in the investment objective. At all times the bonds will have effective maturities that correspond with the calendar year maturity outlined in the investment objective. In order to improve the tax efficiency of the portfolio, the portfolio management team will prioritize bond issuances that are trading at a discount to their maturity value, commonly referred to as "discount bonds". The Fund may also hold money market instruments, securities of money market funds or cash to meet its current obligations.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors looking for regular income and exposure to Canadian-dollar denominated investment grade bonds with a target maturity date; with a low tolerance for risk and plan to hold this investment until its termination date.

Results of Operations

This commentary is based on the performance of Series A units of the Fund. Returns for other Series of units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details.

The Fund's net asset value increased by 38% to \$24.6 million at June 30, 2025 from \$17.9 million at December 31, 2024. Of this change, an increase of \$0.5 million was provided by investment performance,

net of fees and expenses, and an increase of \$6.2 million was attributable to net subscriptions.

Series A units of the Fund posted a return of 1.9% for the period. The Fund's benchmark, the FTSE Canada 2027 Maturity Corporate Bond Index returned 2.4% for the same period. The Series A return is after the deduction of fees and expenses, unlike the benchmark's return.

Bond markets delivered positive total returns during the first half of 2025, driven by moderating inflation, signs of slowing economic growth and easing monetary policy. This resulted in a steepening of the yield curve, led by lower short and mid-term rates, as the Bank of Canada (BoC) reduced its policy rate by 50 basis points from 3.25% to 2.75%. The US Federal Reserve (Fed) kept the fed funds target rate unchanged at 4.50%. Globally, other central banks took similar easing measures, as the European Central Bank (ECB) lowered its policy rate by 100 basis points, while the Bank of England (BoE) lowered rates by 25 basis points, and the Swiss National Bank (SNB) lowered rates by 50 bps to 0%.

Domestically, the net result was positive performance for the broader fixed income universe (FTSE Canada Bond Universe Index; +1.44%), with mid-term bonds (FTSE Canada Mid-Term Overall Bond Index; +2.30%) outperforming both the short-end (FTSE Canada Short-Term Overall Bond Index; +2.19%) and the long-end (FTSE Canada Long-Term Overall Bond Index; -0.57%) bonds. Corporate bonds (FTSE Canada All Corporate Bond Index; +2.28%) outperformed government bonds (FTSE Canada All Government Bond Index; +1.17%).

The Fund's overweight exposure to Provincial government bonds and corporate bonds within the Financial and Real Estate sectors contributed positively to performance. The Fund's credit selection to corporate bonds in the Real Estate, Financial, and Communication sector detracted from performance.

As at June 30, all or a significant majority of the bonds held in the Fund are traded at a discount to their par value, offering potential tax efficiency as the bonds

mature are par and the price appreciation is treated as a capital gain, which is taxed more favorably than interest income. Tax efficiency is dependent upon the proportion of discount bonds held by the Fund, which cannot be predicted and is expected to fluctuate over time, depending on prevailing market conditions, the rate at which an investor is taxed, as well as the impact and timing of subscriptions and redemptions.

The Manager integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. ESG considerations are evaluated for material financial impact on a company's sustainability and business operations, but which may have a limited role in investment decisions for the Fund. The consideration of ESG issues is only one of a number of elements in the portfolio construction process and may or may not have a material influence on portfolio composition at any given time. Active engagement and proxy voting are a core part of the Manager's stewardship approach, and the Manager participates in these activities in a manner suitable to the asset class and Fund. Certain securities, such as derivatives, cash, money market instruments, bonds, asset-backed securities, commercial paper or other similar instruments, may not be subject to ESG considerations due to the nature of such instruments.

The Fund's ESG characteristics and performance may change from time to time. Please review the Fund's prospectus for more details on how the Fund's investment strategy incorporates responsible investing considerations and the associated risks. For more information, the Manager posts its annual proxy voting reports, along with an annual Responsible Investing Report and its Responsible Investing Policies on its website:

Recent Developments

The Fund continues to maintain an overweight exposure to corporate bonds within the Communication, Energy, and Financial sectors. The Manager continues to actively seek attractive

opportunities to enhance portfolio structure and relative total returns.

The outlook for the Canadian economy remains uncertain, as the downside risks to growth are starting to manifest, particularly in tariff-sensitive sectors. Monetary policy is expected to be supportive of fixed income returns, as the BoC continues on its path of easing/expansionary policy of lower rates.

The regime change in the US and the accompanying uncertainty about the Administration's approach to economic policy, especially with respect to international relations and trade, has clouded the outlook for not just the US but the entire world and resulted in significant financial market volatility. The introduction of sweeping new tariffs stands to have a significant negative impact on the trajectory of global growth, given that the export of goods and services across borders accounts for roughly one-third of global output. As well, the cost increases associated with tariffs carry material implications for global central bank policy and interest rates, adding to the uncertainty and greatly impacting investment and spending decisions, which in turn has had significant impacts on the outlook for the global economy and financial markets.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a "related party" of the Fund. The Manager is responsible for the day-to-day operations of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, based on the average Net Asset Value of the Fund, as detailed in the Management Fees section below. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Manager also receives an Administration Fee from the Fund, amounting to 0.05% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of

the Fund. The Independent Review Committee (“IRC”) has approved the Manager’s Policy for this item and the Manager relies on this approval as a standing instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series A, Series F and the ETF Units are subject to management fees which are based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series A management fee is 0.70% per annum. The Series F and ETF Units management fee is 0.20% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the period.

	Series A	Series F	Series I	ETF Units
Investment management and other general administration	28.6%	100.0%	n/a	100.0%
Trailer Commission	71.4%	n/a	n/a	n/a

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

For Series I units, please note that it has not yet been 12 consecutive months since the performance inception date of this Series, thus, in accordance with regulatory requirements, investment performance cannot be shown.

Year-by-Year Returns

As this Fund was new in 2024, it does not have a full calendar year of performance.

[2] The management expense ratio is based on total expenses (excluding commissions, other portfolio transaction costs and withholding taxes) of the Fund and its proportionate share of the total expenses of the Underlying Funds, where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

[3] The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and its proportionate share of the Underlying Funds' portfolio transaction costs, where applicable, expressed as an annualized percentage of daily average net asset value for the period.

[4] The Fund's portfolio turnover rate indicates how actively its portfolio advisor trades portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in the portfolio once in the course of a year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
