Unlike traditional exchange traded funds (“ETFs”), the GuardPath™ Managed Decumulation 2042 Fund (the “GuardPath ETF”) is a unique investment fund structure and investors should carefully consider whether their financial condition and investment objectives are aligned with this retirement-focused investment. The GuardPath ETF may be suitable for an investor primarily concerned about having sufficient income in retirement, especially in the later years of their life. It may not be suitable for an investor whose primary objective is to leave capital behind for their estate. The GuardPath ETF is not an insurance company, nor an insurance or annuity contract and unitholders will not have the protections of insurance laws. Distributions provided by the GuardPath ETF are not guaranteed or backed by an insurance company or any third party. The long-term total return and the sustainability of the rate of distributions of the GuardPath ETF may be impacted by volatility and sequence of returns risk. This is not a complete list of the risks associated with an investment in the GuardPath ETF. Please refer to the prospectus of the GuardPath ETF for details.

Commissions, management fees and expenses all may be associated with investments in the Guardian Capital ETFs. Please read the prospectus before investing. For ETFs other than money market funds, unit values change frequently. ETFs are not guaranteed and past performance may not be repeated. You will usually pay brokerage fees to your dealer if you purchase or sell units of an ETF on the Toronto Stock Exchange (“TSX”) or Cboe Canada Inc. (“Cboe”). If the units are purchased or sold on the TSX or Cboe, investors may pay more than the current net asset value when buying units of the ETF and may receive less than the current net asset value when selling them. ETF and mutual fund securities, including units of the Guardian Capital ETFs, are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the Guardian Ultra-Short Canadian T-Bill Fund or the Guardian Ultra-Short U.S. T-Bill Fund will be able to maintain the net asset value per unit of the mutual fund units at a constant amount or that the full amount of your investment in these money market funds will be returned to you.
