

Guardian

i³ Global Quality Growth ETF

Seeks to create wealth through the investment in companies that provide high-quality sustainable earnings growth

The **i³ Investments** solutions are focused on delivering risk-adjusted returns and providing investors with building blocks to create sophisticated multi-asset portfolios.

Fusing artificial intelligence (ai), human intelligence (hi) and innovation (i), the **i³ Investments** team provides a modern approach to portfolio construction.

$$ai * hi * i = \alpha_{\text{opportunities}}$$

Investors tend to focus on their domestic market. In large and diverse markets, a 'home' bias will not pose a problem. In a country such as ours, where we comprise of less than 5% of the capitalization in global equity markets, this type of concentration can have a significant effect on investors' portfolios.

THE CHALLENGE

-32%

The percentage that stock dispersion has dropped from 2009 to 2018, while correlations have increased indicating a sign of strain in the market.¹

#1

Canada has the highest concentration of closet index funds in the world, leading to a large number of highly inefficient portfolios.²

44 of
642

Actively managed funds in Canada have outperformed their index over the last 10 years (7%). Alpha is scarce.³

Answering the Challenge

Investment Intelligence Evolved. The **i³ Investments** approach focuses on delivering differentiated alpha and diversification, enhancing investment outcomes.

A Focus on Quality + Growth

Increases investor exposure to factors that have driven risk-adjusted returns.

Alpha Generation

Designed with the objective of generating persistent alpha by using big data and machine learning to aid in the prediction of sustainable earnings growth.

Diversification

Added geographies help to improve overall portfolio diversification while maintaining defensiveness.

Innovation

Evolution of both quantitative and fundamental analysis improves forecasting accuracy, reduces manager bias and exploits alpha generation opportunities.

Investment Process

Guardian i³ Global Quality Growth ETF uses the **i³ Investments** process to create a global equity strategy, identifying companies with the highest quality and growth characteristics. The underlying strength of quality companies is their ability to generate consistently solid earnings growth, which helps to insulate them from down market volatility, and to generate alpha opportunities over the longer-term and throughout full market cycles.

An evolved approach to traditional broad investment choices, **Guardian i³ Global Quality Growth ETF** seeks to invest in the best of future growth themes and the quality companies inhabiting that space.

Please read the prospectus before investing. Important information about the Guardian Capital exchange traded fund ("ETF") is contained in its prospectus. Commissions, trailing commissions, management fees and expenses all may be associated with investments in ETFs. You will usually pay brokerage fees to your dealer if you purchase or sell units of an ETF on the Toronto Stock Exchange ("TSX"). If the units are purchased or sold on the TSX, investors may pay more than the current net asset value when buying units of the ETF and may receive less than the current net asset value when selling them. The indicated rate(s) of return is/are the historical annual compounded total return(s) including changes in unit value and reinvestment of all distributions and does/do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated. This document is intended as a general source of information.
