Sustainable Funds
Diversified, multi-asset ESG solutions

Our Sustainable Funds combine simplicity and ease-of-use with a purpose rooted in ESG (environmental, social, and governance) and professionally managed solutions. They were designed to help build and preserve wealth while contributing to a sustainable world.

These multi-asset, innovative solutions aim to achieve their investment objectives primarily through investment in Guardian mutual funds and ETFs and/or third-party mutual funds and ETFs (the “underlying funds”).
Our Sustainable Funds provide several important benefits:

1. **Applying responsible investing principles**
The Sustainable Funds seek to align investment exposure with ESG values. They do so by applying a high standard of ESG oversight, based upon disciplined and objective scrutiny.

2. **Leveraging 60 years of leadership in institutional asset management**
Driven by the insights of Guardian Capital LP’s (GCLP) Asset Mix Committee, a team of experienced investment professionals, the Sustainable Funds are built and actively managed using similar sophisticated investment tools and techniques as large institutions, seeking to deliver optimal investment outcomes.

3. **Diversification in a simple, convenient package**
The Sustainable Funds not only invest across a wide variety of asset classes, countries and sectors, but also across various styles, factors and themes in an effort to best capitalize on opportunities and manage volatility. The Funds are also diversified by holding a collection of underlying mutual funds and ETFs managed by GCLP and other managers, allowing for flexibility.

- All of these benefits are available in a single fund that can be specifically chosen to align with your risk tolerance.

### Strategic Asset Allocation Targets*

The manager aims to invest in underlying funds that focus on the below asset groups:

- **Equities**
  Stocks/shares that represent an ownership stake in a company. Largely used as vehicles to achieve capital growth.

- **Income**
  Primarily refers to investment income earned from bonds. These positions tend to be more conservative than equities, and therefore are better positioned to preserve capital.

- **Thematic Assets**
  Investment exposure in assets that are related to improving social or environmental sustainability.

- **Real Assets**
  Refers to assets that are “hard” or tangible, like real estate and infrastructure. These types of securities can be beneficial diversifiers as they tend to perform differently than stocks or bonds.

- **Liquid Alternatives**
  Investment funds whereby the portfolio manager is afforded considerable flexibility to utilize certain sophisticated investment tools, often as a way to manage volatility and/or enhance the level of income earned.

*For Illustrative Purposes Only. The manager aims to invest in underlying funds that focus on the above asset groups. Figures represent strategic targets only and may be subject to change over time.
Investment process and ESG integration

GCLP’s portfolio management team employs sophisticated techniques to build and manage the Sustainable Funds. They seek to deliver results through the utilization of underlying funds whose fund manager is a signatory of the United Nations-supported Principles of Responsible Investment, and with Above Average Morningstar® Sustainability Ratings.™ Additionally, they aim to achieve this by focusing on ESG-specific and thematic underlying funds, such as those focused on clean energy or green bonds.

ASSET ALLOCATION

Each Sustainable Fund aims to stay true to its strategic asset allocation target through regular rebalancing. The manager has flexibility to deviate slightly from the target mix based on their view of opportunities or near-term risks.

SCREENING

Once the asset allocation is set, the manager screens the investable universe for underlying funds that best meet high sustainability standards, along with prospects for attractive risk-adjusted returns. Underlying funds with Below-Average Sustainability Ratings, regardless of total return potential, cannot be included in the Sustainable Funds’ portfolios.

What is a Morningstar® Sustainability Rating™?
The Morningstar® Sustainability Rating™ 1 is a measure of how well the holdings in a fund are managing their ESG risk relative to the fund’s global peer group.
The Sustainable Funds will generally maintain an Above Average sustainability rating, placing them in the top third of their global category.

RESEARCH

The manager performs in-depth due diligence on the shortlist of underlying funds derived from the screening process, to ensure they have confidence that each underlying fund is suitable for inclusion in the Sustainable Funds before investing.

PORTFOLIO CONSTRUCTION

Beyond looking at the individual merits of each underlying fund, the manager seeks to incorporate underlying funds that work well together. Incorporating underlying funds with low correlation to one another helps to minimize risk and aims to smooth out potential volatility.
Choose the Sustainable Fund that’s right for you.

Sustainable Income 100 Fund
This fund holds 100% income-producing securities to emphasize income-generation and help preserve capital.
Series A GCG509 | Series F GCG609

1 The Morningstar® Sustainability Rating™ is intended to measure how well the issuing companies of the securities within a fund’s portfolio are managing their environmental, social, and governance (“ESG”) risks and opportunities relative to the fund’s Morningstar category peers, and is updated monthly. The Morningstar Sustainability Rating is depicted by a globe icon where 5 globes equals High ranking (lowest ESG Risk) and 1 globe equals Low ranking (highest ESG Risk) compared to category peers, based on each fund’s Morningstar® Portfolio Sustainability Score™. A Sustainability Rating is assigned to any fund that has more than half of its underlying assets receiving an ESG Risk Rating from Sustainalytics, and is within a Morningstar Category with at least 10 scored funds; therefore, the rating is not limited to funds with explicit sustainable or responsible investment mandates. Please refer to http://corporate.morningstar.com/ SusttainableInvesting/ for more detailed information about the Morningstar Sustainability Rating and its calculation. Sustainalytics is an ESG and corporate governance research, ratings, and analysis company affiliated with Morningstar, Inc. © 2022 Morningstar®. All Rights Reserved. Guardian Capital LP is a signatory of the United Nations-supported Principles of Responsible Investment (UN PRI). The UN PRI does not prescribe the exclusion of any particular type of company or industry; rather it requires that, as the Manager, we are informed on the ESG issues, and that we are comfortable with the activities and practices of the companies that we invest in. Our Responsible Investing policies are publicly available on our website at https://www.guardiancapital.com/investmentsolutions/responsible-investing/. Responsible investing is an approach to investing that incorporates ESG considerations into investment decisions. This approach may incorporate considerations beyond traditional financial information into the investment selection process, which could result in investment performance deviating from other products with comparable objectives or from broad market benchmarks.

Guardian’s Sustainable Funds and GEM Pools have ESG-related investment objectives, while other Guardian Mutual Funds and ETFs do not have ESG-related investment objectives. All Guardian Funds integrate ESG considerations into the investment analysis of all holdings within their respective portfolio. A Fund’s ESG characteristics and performance may change from time to time. Please review the Fund’s prospectus for details on how the Fund’s investment strategy incorporates responsible investing considerations and the associated risks, and consult your financial professional prior to investing. Guardian Capital LP manages portfolios for defined benefit and defined contribution pension plans, insurance companies, foundations, endowments and investment funds. Guardian Capital LP is wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.
