\* These Funds did not pay any distributions in calendar year 2023.

1. The Guardian U.S. Equity Fund is valued in USD. Distributions for Series I are paid in USD, while distributions for Series A & F are converted to and paid in CAD.

2. The Guardian Ultra-Short Canadian T-Bill Fund and Guardian Ultra-Short U.S. T-Bill Fund were launched in June 2023, and their distributions reflect a partial year.

3. The Guardian Ultra-Short U.S. T-Bill Fund is valued in USD, and distributions are paid in USD.

**NOTE:** Any portion of a Fund's distributions that were not paid in cash; rather they were reinvested in additional units and consolidated, are considered notional distributions. The net asset value per unit is unaffected by a notional distribution, and the impact to unitholders will be an increase in the Adjusted Cost Base (ACB) of their holdings by the amount of the notional distribution.

## This distribution and tax data is for informational purposes only and should not be construed to be tax advice. Please consult your own tax advisor for advice.

Distributions are paid in Canadian dollars unless otherwise stated. Each Fund makes distributions in accordance with the distribution policy stated in its Prospectus. Distributions may consist of net income, dividends, net realized capital gains, and may also include return of capital. Distributions are determined by a variety of factors that occurred during the current tax year, including the gains realized on the disposition of securities by the Fund, the amount of dividend income and interest earned by the Fund, the volume of purchases and redemptions of Units of the Fund, and the amount of any unrealized appreciation of the Fund's portfolio at year-end. If distributions paid by the Fund are greater than the income and performance of the Fund, distributions paid may include a return of capital and an investor's original investment will decrease. A return of capital is not taxable to the investor, but will generally reduce the adjusted cost base of the securities held for tax purposes. If the adjusted cost base falls below zero, investors will realize capital gains equal to the amount below zero.

The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Future distribution dates may be amended at any time. Reinvested distributions are not paid in cash but instead remain invested in the Fund. To recognize that reinvested distributions have been allocated to investors for tax purposes the amounts of these distributions should be added to the adjusted cost base of the units held. The characterization of distributions for tax purposes (such as dividends/other income/capital gains etc.) will not be known for certain until after the Fund's tax year end. Therefore investors will be informed of the tax characterization after year-end and not with each distribution. For tax purposes these amounts will be reported annually on official tax statements by the tax reporting deadline.
